

Easy-to-handle power.

Cruising fun, exciting performance, styling and comfort, and lots of new features all guarantee the new VX's position among the most popular WaveRunners. Naturally, fully equipped with the all-round versatility and quality the VX line-up is renowned for.

From our unique, revolutionary RiDE system and lightweight NanoXcel2® hulls, to our exclusive electronic control systems, to the awesome supercharged four-stroke 1812cc engine in our most powerful model, the innovative technology and engineering that's integral to every Yamaha is right at the cutting edge.

Attention to detail, advanced design and sheer build quality add even more to the package – the result is a guarantee of excellent performance and premium comfort, the best of both worlds!

- Excellent new ergonomic driving position
- Adventurous new styling, colours and graphics
- Revolutionary RiDE system for intuitive control
- Powerful TR-1 High Output 1049cc three-cylinder engine
- Easy re-boarding with extended re-mount platform
- Huge and practical storage – 114 L capacity
- Large, watertight glove box and separate phone storage
- Convenient self-draining footwells
- Electronic Reverse
- Large dual mirrors

Easy-to-handle power.

Great performance, styling and comfort, exceptional economy, low maintenance and lots of cool new features all guarantee the new VX's position among the most popular watercraft. Plus it has, of course, the incredible all-round versatility the VX line-up is renowned for.

As well as a High Output version of our TR-1 engine, the new VX also has a newly designed narrow seat and deep, wide footwells for easier handling, plus our revolutionary RiDE™ control technology. This intuitive, user-friendly system brings an immediate level of confidence, even to less experienced riders.

This latest WaveRunner VX, with its sleek new deck styling, attractive colours and graphics, offers an unbeatable package of exciting, ultra-capable and enjoyable on-water performance – class-leading quality in fact. Check it out and you'll see that no other watercraft can actually do that.

Narrower seat design – more comfort and better handling

Both the super-comfortable two-piece seat and the handlebar of the VX are new, narrower designs, which provide excellent ergonomic sitting and driving positions. Together with the deeper, wider footwells and new-design grips, this gives great control over the handling.

RiDE system (Reverse with Intuitive Deceleration Electronics)

The revolutionary RiDE system transforms your riding pleasure, bringing a new feeling of confidence to every rider at every level. Simply pull the lever on the right hand-grip to move forward and accelerate. Pull the lever on the left grip to slow down or reverse.

TR-1 High Output 1049cc three-cylinder engine

The VX is powered by our innovative three-cylinder engine, the 1049cc High Output TR-1. This remarkably compact and lightweight unit packs a real punch, and offers lively acceleration and great top-end power, plus economy and reliability. The light weight of this engine also helps deliver superior handling, agility and balance.

Huge and practical storage facilities

The latest VX has huge amounts of practical storage space, including under-seat and bow storage, a very large, watertight glove box and even a handy space for your phone.

Sleek, modern design and graphics

We wanted the very latest VX to look good as well as feel good, so we've re-designed the upper deck and added a powerful, attractive new colour and graphics scheme that's sure to catch the eye as you blast across the water. Looks great at the dock too!

Unique electronic systems for maximum control

Yamaha's latest electronic systems, standard on the highly affordable new VX, deliver a stunning mix of rider benefits and advantages. They include electronic Reverse – a feature of the amazing Ride system – and reliable engine and driving information fed to the console's clear, easy-to-read display.

Engine
