

More people. More possibilities

Four seats can change a day surprisingly quickly. One minute it's a quick ride, the next it's a debate about which bay to explore next. The hardest part isn't choosing a destination. It's deciding when the ride's over.

With a walk-around deck, 310L of storage and the largest fuel tank in the WaveRunner range, the CrossWave is built for bigger adventures. Fishing gear, watersports equipment, extra supplies or all three, it takes a lot to fill this much space. The phrase "just the essentials" tends to lose all meaning from this point on.

A powerful 1.9L High Output engine delivers the performance to match its size, while integrated Yamaha Music audio provides the soundtrack for whatever happens next. Every journey starts with more possibilities. The smart bet says none of them involve getting home early.

- 4 passenger seats
- Walk-around deck with oversized footwells
- Largest fuel tank in the WaveRunner range
- Integrated T-Track system
- Yamaha Music integrated audio system
- Yamaha patented pump cleanout port
- 4-cylinder, 4-stroke, 1.9L High Output Yamaha Marine Engine
- Industry-leading storage
- Battery cut-off switch

Built for bigger days

Leaving early is overrated. Our largest WaveRunner yet carries four, powered by a 1.9L High Output Yamaha marine engine that refuses to compromise on speed, stability or thrill. Bring more people, cover more coastline and make more of the day. After all, the best rides are the ones nobody wants to end.

A 100L fuel tank and 310L of storage make it remarkably easy to stay out longer than intended. Add integrated Yamaha Music audio, a horizontal display helm and T-Track system, and suddenly “one quick ride” starts sounding wildly optimistic. Especially when you’ve got the freedom to make it your own.

Some people follow the coastline. Others wonder what’s beyond the next headland, then the one after that. From chasing fish before breakfast to exploring new stretches of coastline long after lunch, the CrossWave is built for riders who prefer to make a full day of it. After all, the best part of any plan is ignoring it at exactly the right moment.

Largest fuel tank in the WaveRunner range

Home is always out there somewhere. The question is whether you're in any rush to get there. With a 99.9L fuel tank, you've got even more freedom to keep exploring, stay out longer and see where a good idea leads next.

Four passenger seats

The more the merrier. Occasionally, the louder. Four seats means more friends, more spontaneous plans and more debate about where to go next. Good luck getting everyone to agree on when it's time to head home.

Industry-leading storage

Pack light. Or completely ignore that advice. With generous storage space throughout thanks to multiple compartments, there's plenty of room for towels, snacks, spare layers, fishing gear and all the other things that somehow become essential once you're out on the water.

Yamaha Music integrated audio system

Every great day deserves a soundtrack. From laid-back coastal cruises to full-throttle fun, integrated Yamaha Music audio lets you bring the right tunes along for the ride. Automatic adjustments to volume, treble and bass keep your music balanced whether you're cruising, carving or picking up the pace.

Integrated T-Track system

No two adventures are the same, so your CrossWave shouldn't be either. The integrated T-Track system lets you personalise your setup with accessories to suit the way you ride, from practical additions to adventure-ready extras.

Yamaha patented pump cleanout port

The clever stuff that lets you get on with the good stuff. The CrossWave is the only WaveRunner equipped with a Yamaha patented pump cleanout port, making it quicker and easier to remove debris and get back to what you were doing. Add a battery cut-off switch for simple power management and you've got less time spent worrying about the details, and more time enjoying the ride.

Engine

Engine type	4-cylinder; 1.9 Liter High Output; 4-stroke
Displacement	1,898 cc
Pump type	155mm high pressure pump
Fuel	Unleaded Regular Gasoline
Fuel capacity	100 l
Oil capacity	2.6 l

Dimensions

Length	3.94 m
Width	1.31 m
Height	1.31 m
Dry weight	588 kg

Features

Storage capacity	310.5 l
Rider capacity	1-4
T.D.E.	Trolling mode
