

Always up for more

You tell yourself it'll be a quick ride. The FX HO nods politely and waits to see how that works out. Before long, you've added another few miles, discovered somewhere new and convinced yourself that turning back now would be a terrible waste of a perfectly good afternoon.

With room for up to three riders on its 2-piece, ridiculously comfy seat it's built for the kind of days that refuse to stay small. The sort that begin with a quick ride and somehow end several hours, a few extra miles and at least one good story later, while still feeling every bit as comfortable as when you set off.

Enhanced Drive Control modes help match the machine to the moment, whether that's relaxed, adventurous or somewhere in between. Combined with a responsive 1.9L High Output engine, they make "just one more ride" hard to say no to. Some machines are built for specific occasions. This one keeps finding new ones.

- 4-cylinder, 4-stroke, 1.9L High Output Yamaha Marine Engine
- Unique four-step tilt-adjustable steering system
- Revolutionary RiDE® system for intuitive control
- 7" display with enhanced Drive Control Modes
- Large storage capacity
- Ergonomic steering

One machine, plenty of possibilities

The best plan is having options. Because not every day starts with a master plan. One minute you're heading out for a quick ride. The next you're inviting friends, packing extra gear and wondering where the rest of the afternoon went. Good ideas have a habit of multiplying out on the water.

That's where the FX HO comes into its own. Equally comfortable entertaining passengers, chasing open water or stretching a short trip into something considerably more ambitious, it's the sort of WaveRunner that makes "while we're here..." a particularly tempting phrase.

The intelligent RiDE® system and enhanced drive modes help tailor the ride, while a capable 1.9L High Output engine ensures there's always plenty of excitement available when the opportunity presents itself. The difficult part isn't deciding what the FX HO can do. It's deciding what to do first.

FX HO

Drive Control modes

One machine. Plenty of personalities. Drive Control lets you tailor top speed, acceleration and trim settings with Economy, Comfort, Performance, Tow and Custom modes. Because the only thing better than having options is having all of them.

Deep reboarding step, dual grab handles and tow hook

Keep the day moving in the right direction with a deep reboarding step, dual grab handles and an integrated tow hook. Swimming, towing, exploring or changing plans halfway through, you're ready for whatever idea arrives next.

Revolutionary RiDE® system (Reverse with Intuitive Deceleration Electronics)

Forward, reverse and neutral are all controlled from a single handlebar-mounted lever, making every manoeuvre feel intuitive and precise. Because life's complicated enough already.

Multi-mount accessory system

The trouble with possibilities is that they tend to need different equipment. The multi-mount system makes it easy to tailor the FX HO with compatible accessories, so whether today's plan is adventure, watersports or something that hasn't been thought of yet, you're covered.

Ergonomic steering

Redesigned grips and controls help everything feel natural from the moment you get underway, while integrated rope hooks make tying up quick and easy. Small detail. Big fan.

4-cylinder, 4-stroke, 1.9L High Output Yamaha Marine Engine

Some days are carefully planned. Others happen five minutes after someone says "Fancy heading out?". Fortunately, the 1.9L High Output engine thrives on both. Delivering the kind of performance that makes every opportunity worth taking, it helps the FX HO turn good ideas into great memories.
