

FX SVHO

Self-control sold separately

Some machines are built to get you there. The FX SVHO makes sure you enjoy getting there far too much. With supercharged performance, intelligent technology and comfort to chase the horizon for longer, it makes a convincing case for taking the long way.

The incredibly powerful 4-stroke 1,812cc engine is always eager to get involved, while the revolutionary RiDE® system helps keep everything feeling smooth, responsive and reassuringly under control. Which is useful, because self-restraint doesn't always make the passenger list.

The 7" touchscreen lets you tailor the experience to suit the day, from ride settings to your soundtrack, while the multi-mount system leaves room for whatever comes next. That's the trouble with combining luxury and a Super Vortex High Output engine. They get along suspiciously well.

- Supercharged 4-cylinder, 4-stroke Super Vortex High Output Yamaha Marine Engine
- Unique four-step tilt-adjustable steering system
- Revolutionary RiDE® system for intuitive control
- Electric trim
- Infotainment 7" Connext Touchscreen with GPS-enhanced Drive Control mode
- Large storage capacity
- NanoXcel2® deck with footwell drains

Going slow was never an option

A supercharged Super Vortex High Output engine and intelligent technology combine to deliver the kind of power that makes every straight line tempting and every stretch of open water an invitation. Created for those who believe good decisions and exciting decisions can be the same thing, it turns self-control into an increasingly ambitious target.

It doesn't take long before a quick ride becomes something else entirely. The turns get wider, the routes get longer, and suddenly you're finding very creative reasons not to head back just yet. Fortunately, features like the adaptive electric trim and enhanced Drive Control mode make it easy to tailor the ride to whatever kind of fun you're having.

Comfortable enough to stay out for hours and versatile enough to adapt as plans change, it encourages a flexible approach to adventure. Which is useful, because plans have a habit of changing the moment the water starts looking this good.

FX SVHO

RiDE® system (Reverse with Intuitive Deceleration Electronics)

Forward, reverse and neutral are all controlled from a single handlebar-mounted lever, making deceleration, reversing and docking feel effortless. Because wrestling with controls is a terrible way to spend a good day on the water.

Supercharged 4-cylinder, 4-stroke Super Vortex High Output Engine

More power. More torque. More temptation. Delivering more of both than any other engine in the WaveRunner range, this supercharged powerhouse turns every stretch of open water into an opportunity to make questionable decisions. The fun kind.

Electric trim

Not all water is the same, so why should every ride be? The electric trim lets you adjust the attitude of the craft at the touch of a button. Bow up for stronger acceleration and less resistance. Bow down for quicker planing and a more planted feel.

Infotainment 7" Connext touchscreen

One screen. Plenty of ways to make the ride your own. From smartphone connectivity and integrated audio to GPS-ready capability, security features and enhanced Drive Control modes, everything is exactly where it should be. Which is handy, because you'll already have enough distractions trying to decide what to do next.

NanoXcel2® deck and SMC hull

Strong where it matters, lightweight where it counts, the durable SMC hull and innovative NanoXcel2® construction are engineered to make the most of every surge of power. Custom-cut deck mats help keep you firmly planted when things get interesting, while clever drainage channels keep the deck fresh and ready for more. Even the footwells know how to stay fresh.
